Canadian Association of General Surgeons Post-Graduate Course:

Hemorrhage Control & Reoperative Surgery Masterclass

Chairs: Dr. Chad Ball

This one-day course outlines sage technical pearls and take-home tricks for stopping life threatening hemorrhage in every body compartment. It extends beyond injury and into both elective open and minimally invasive surgical cases. Both REBOA and ‘Stop the Bleed’ course certifications are also included in the course.

Target Audience: Surgeons who require hemorrhage control and complex re-operative skills (community surgeons, academic surgeons, surgical fellows, senior surgical residents).

Learning Objectives:

➢ Learn how to arrest ongoing life-threatening haemorrhage in open surgical cases
➢ Learn how to arrest ongoing life-threatening haemorrhage in laparoscopic surgical cases
➢ Learn how to arrest ongoing life-threatening haemorrhage in trauma surgical cases
➢ Learn how to preoperatively diagnose and optimize patients, as well as, perform safe intraoperative techniques in re-operative cases
➢ Obtain comfort in deploying a REBOA in your local environment
➢ Obtain ‘Stop the Bleed’ certification and teacher status

Agenda:

8:00-8:20: Introduction and surgical pearls for stopping hemorrhage

8:20-8:55: Stopping hemorrhage during laparoscopic cases: Do I open now?

8:55-9:30: Stopping cardiac hemorrhage: Treating the bleeding heart!

9:30-10:05: Stopping hemorrhage in the community setting: I wish I was MacGyver
10:05-10:40: Junctional hemorrhage: How do I stop bleeding I can’t see?

10:40-11:15: Case Panel: Video based hemorrhage cases I: What do I do now?

11:15-12:50: Lunch and REBOA Workshop

12:50-13:25: Endoscopic hemorrhage control: I can’t see anything!

13:25-14:00: Stopping head and neck hemorrhage: I haven’t operated here in a while!

14:00-14:35: 10 pears for re-operative surgery: I can’t believe I booked this case!

14:35-15:10: Stopping pulmonary hemorrhage: Breathing under water!

15:10-15:30: ‘Stop the Bleed’ Certification

15:30-16:00: Case Panel: Video based hemorrhage cases II: That’s a lot of blood!
