

Advanced Third Space Endoscopy/Canadian Association of Thoracic Surgeons

Co-Chairs: Dr. Biniam Kidane, Dr. Andrew Giles and Dr. Stephen Gowing

Course Description: This is a course focused on third space endoscopy, including ESD, POEM and its various sub-variants (Z-POEM, G-POEM). Through a mix of didactic, video-based and live animal surgery, the course will focus on the fundamentals, principles and conduct of these procedures as well as content related to setting up a viable and sustainable third space endoscopy practice and program.

Target Audience: Thoracic and General Surgeons as well as General & Thoracic Surgery trainees

Learning Objectives:

- Objective 1: learn the principles of third space endoscopy and the tools used to accomplish the different components of ESD and POEM
- Objective 2: Acquire experience with using the tools used to accomplish the different components of ESD and POEM
- Objective 3: Acquire experience with the conduct of the different components of ESD and POEM
