

Canadian Society of Surgical Oncology Post-Graduate Course: Current Practices and Controversies in Benign and Malignant Breast Disease

Chairs: Dr. Shaila Merchant and Dr. Allison Maciver

Course Description: This ½ day course will review the current practices and controversies in the management of selected benign and malignant conditions of the breast.

Target Audience: General Surgeons, Surgical Oncologists, Breast Surgeons, Residents and Fellows who have an interest in or participate in the management of patients with benign and malignant breast disease.

Learning Objectives:

- Objective 1: To recognize current trends in and controversies related to systemic therapy, radiation therapy and surgery for malignant breast disease.
- Objective 2: To describe current trends in the management of high-risk breast lesions.
- Objective 3: To identify current trends in de-escalation of breast cancer treatment.
- Objective 4: To indicate the approaches to breast surgery using regional techniques.

Agenda (subject to change):
